

THE FIRST MOBILITY WITHIN THE SOLARIZE PROJECT HAS BEGUN!

Almería, October, 2025

The **SOLARIZE** mobility programme has officially taken off! The first participating researcher, PhD student **Alejandro Bueso** from **CIEMAT**, Spain, has just begun his six-weeks stay at **INIESC Évora** in *Solar Concentrators Testing Platform (PECS)*, in *Polo da Mitra da Universidade de Évora*, Portugal, marking the start of the exchange activities among project partners.

This milestone highlights one of the key goals of the **SOLARIZE** project: fostering collaboration between institutions, strengthening research skills, and creating new opportunities for joint innovation.

Researchers from partner institutions are warmly invited to apply for upcoming mobility opportunities and take advantage of this unique chance to connect, collaborate, and grow.

Find out how to join the programme here: [Mobilities - Solarize](#)
